

Wynan Limited

Air Filter Supplies

Wynan has been involved in the manufacture of air filter frames for over ten years. From our factory in Kent we offer a range of standard sizes as well as designing bespoke frames to our customer's specifications.

Standard frame sizes are available from stock and can be delivered to most European countries within 8 working days.

Non-standard frames can be manufactured to suit your specific requirements, please contact us for further information.

Our standard frames are manufactured from white lined chipboard. However we also manufacture a range of polypropylene filter cases and waterproof profile strips made from fibreboard. Please refer to our product pages if you require further information or sizes.

We can provide a sampling service for non-standard frames. This helps eliminate the chance of extra tooling costs due to size changes. Up to 10 frames will be supplied.
