NEWLANDS

Newlands Engineering

Maidstone, Kent, UK

**Precision Engineers - CNC Machining, Turning and Milling, Finishing.
Communications, Robotics, Medical, Automotive, Security Industries**

Precision-engineered components manufactured to meet the specific needs of the customer, giving the customer the right product. Extensive experience at Newlands Engineering enables us to focus on the customer's needs and translate these requirements into components that are manufactured with precision for a wide variety of high-tech industries.

A continuing programme of investment in the latest CNC machinery and computer technology systems including CAD/CAM and Windows software enables us to provide a professional, progressive service. Whether the customer is looking to create a prototype or is developing a production run, our expertise can be used to produce the appropriate components.
