

# Dover Pride

The regeneration of the town is being orchestrated by Dover Pride, the multi-agency regeneration partnership for Dover. The partnership is committed to secure long term regeneration of the town by combining work from key agencies and stakeholders to drive forward a broad range of projects while also renewing a sense of pride in the community.

It is estimated that the current projects will provide around £500 million of investment, creating and safeguarding over 5,500 jobs, as well as creating many new businesses and developing over 15,000 square metres of commercial space. Other benefits include creating over 800 new residential units, reclaiming over 35 hectares of brownfield land and upskilling over 6,000 local people.

- Securing strategic involvement in the Dover Priory Station Interreg-funded project
- Generating a positive message for change through urban renaissance

Nine catalytic projects will help to achieve the vision and deliver the transformational actions of improving skills, raising economic activity, improving infrastructure and education-led regeneration.

Cannon Street

The Dover Pride Regeneration Partnership has already achieved the following:

- Successful lobbying of the government for a prompt planning decision on the White Cliffs Business Park
- Successful lobbying of the government for early action on the Dover Town Investment Zone, a town centre site
- Securing significant investment from SEEDA and English Partnerships for Dover Town Centre
- Successful lobbying of government departments to secure the extension of the High Speed Rail Link from London to Dover, and reject the application for an Open Prison at Connaught Barracks

## Projects

Dover Waterfront is set to become a thriving, lively and popular destination with the potential development of a new marina, hotel, residential, commercial, retail and leisure uses. This mixed use site will sit alongside the planned £300 million Port of Dover expansion
