15th Century product, 21st Century application, print has moved from an expensive labour intensive industry to an instant form of communication in which we all claim to be market leaders. The truth however lies somewhere in between. In these modern times the machinery available means that everybody can produce a decent end product, and the major concern of the client is a dirty word known as 'price'. At A.D.S. we use the following statement as advice to our prospective clients

**'the bitterness of poor quality and service remains long after the sweetness of a low price is forgotten...'**

Everybody can produce something cheaper but not always on time and to the satisfaction of the customer. As in the 15th century 'caveat emptor' is still in fashion.

At A.D.S. we believe in building a client and supplier relationship, promoting the product by discussion, as it is important to realise that 'print' is teamwork. If you would like more information, or would like a quote on a future promotion, please feel free to call or email.
