sales@airbrakeconnections.co.uk

Started June 1992, Air Brake Connections set out to specialize in the distribution of Air Brake Fittings and ancillary items for the commercial vehicle industry, mainly the Trailer Market.

Our main aim over the years has always been to provide the best service and product range available. We appreciate the importance of quality control and are therefore ISO 9001: 2000 registered.

Our Fittings Product Range consists of SIRIT's Push In Range of which we are sole U.K distributors and have obtained the TUV approval for this modular system of which is standard fit to IVECO and a large number of OEM Trailer Manufacturers. We are also distributors of JOHN GUEST, NORGREN of which have been added to our range over the years. We also carry a large stock of Compression Fittings Nylon Tubing, Air Reservoir's, Brake Hose Assemblies, Kunifer Tubing, Air Coils etc,etc.

We also specialize in assembling push in fitting kits for trailer manufacturers to suit there needs, as no trailer builder builds the same.

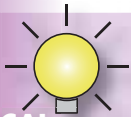

As the major fitting supplier to the trailer manufacturers we feel we can offer a service that is second to none.
