

Solid State

Offering Manchester the very latest life safety electronic systems

With almost 35 years' experience in the design, installation, commissioning and maintenance of fire detection, voice alarm, call system and disability products, Solid State is truly qualified to meet the complex life safety requirements of today's multi-purpose sites.

Our working practices have been assessed to some of the UK's most exacting standards including ISO 9001 and the BAFE (British Approvals for Fire Equipment) SP203 scheme.

Disabled Refuge Systems

CONTITECH

...one of the region's largest and longest established companies

OUR PEOPLE

The company's greatest asset is its people and with this belief firmly in mind we have made enormous efforts and investment to achieve the new "Investors in People" standard. Working closely within the "Investors in People" policies and practices, great strides forward have been made over the last few years in developing our team in-line with changing business objectives, increased efficiency in working and operational procedures and an enthusiasm to further nurture the company's global working partnership.

OUR COMPANY

ContiTech, leading innovators and manufacturers of power transmission belts and part of the world renowned Continental Corporation are delighted to have been serving the Wigan community and contributing to the region's commercial progress for over 50 years.

OUR COMMUNITY

The closeness to the community and inherent team spirit that has derived from being one of the area's largest employers has seen massive and consistent efforts made by the ContiTech team in raising money for local charitable organisations. These have included significant fund raising for Wigan and Leigh Hospice and a charity called C.R.Y. (Coronary Risk in the Young).

OUR VISION

ContiTech has a vision to continue growing and developing its global commercial operation and bringing further employment opportunities to the region. It is committed to developing and training its work force to continue competing in this highly competitive market place and providing a first class service to all its customers.
